

Policy cost and its composition

Fixed order was least costly; adaptive fidelity did not win on this workload.

policy	C	O	P	R	X	total
fixed order	57,672	16,384	512	512	0	75,080
development-frozen	72,408	16,384	512	512	0	89,816
adaptive fidelity	70,360	16,384	512	5,336	0	92,592
exhaustive	131,072	0	512	512	0	132,096

Components sum to each total; all policies matched the exhaustive decision in 64/64 blocks.
