

What the evaluation resolved and what remained ambiguous

Panels separate immutable outcomes from their scientific evidence classes.

A A1 preserves observational ambiguity

 1 retained  2 retained

generating rule retained: 64/64

B ECA class: retention and inadequacy

B0: in-class generating rule

Class retained 64/64

B1: ECA class

constructed radius-two setting

MODEL_CLASS_INADEQUATE 64/64

B1 minimum class lower bound: 0.5

Inadequacy is limited to this constructed setting.

C D2-CERT: certificate-pipeline conformance

Periodic Rule 170 is a cyclic shift.

Global density is analytically preserved.

● 0/64 calibration conformance failures

● 0/64 held-out conformance failures

Checks the certificate pipeline, not unknown
coarse-law accuracy.

Machine status: NOT_CONTRADICTED_BY_LOCKED_AUDIT

D Evidence classes are not interchangeable

Analytical / deterministic / formula conformance

A0, C, D0, D1, D2-MEM

Constructed-workload conformance

A1, B0, B1, E, F0

Constructed closed-map certificate-pipeline conformance

D2-CERT

Categories describe evidence type; they are not pooled
performance evidence.
